PROFESSIONAL EXPERIENCE

Software Engineer

2023 - 2024

Edatis - Tunis, Ariana

Experience collaborating with an international team for the design and development of web applications.

- Active participation in creating a marketing campaign management system, improving the speed and efficiency of bug fixes.
- Contributed to the maintenance and optimization of the Hub Score platform's codebase, resulting in improved overall performance.
- Developed landing pages and push notification systems dedicated to campaigns, with automated sending and hosting on a dedicated domain.

Software Development Intern

2023 - 2023

Neocortex - Tounsi, Lac 2

Development of an employee recognition and rewards platform.

- Designed an interactive system allowing employees to receive recognition and rewards for their performance, thus strengthening the company's culture of appreciation.
- Contributed to improving employee satisfaction and engagement, promoting better talent retention.

Part-Time Software Developer

2020 - 2021

Saheelha - Tounsi, Manouba

Development of a medical consultation application with integrated messaging.

- Designed and implemented a service allowing patients to easily access remote consultations, thus improving the responsiveness of care.
- Integrated advanced security and privacy features to ensure the protection of user data.

EDUCATION

Engineering Degree in Computer Science

2019 - 2023

ISI Ariana - Tunis, Ariana

- Specialization in Software Development Engineering.
- Final year project: design and development of an employee recognition and rewards platform.

Applied Bachelor's Degree in Information Technology

2016 - 2019

ISSET Rades - Tunis, Rades

- Specialization in Information Systems Development.
- Final year project: development of a dashboard for the Zimbra mail server.
